

About GreenSHIP

GreenSHIP is the brainchild of Dr. Elangovan Muniyandy, M.E, Dr.Eng, who holds a doctorate in Naval Architecture from Japan. He along with a group of technical expert from different domain (CFD, Modelling, Database, seakeeping, ship operations and software) came together with a single minded devotion to work collectively to indigenously develop Ship Design and operation technology which has hitherto been the sole prerogative of many European and overseas companies.

GreenSHIP objective is to develop technology that takes care of all aspects of ship design and operations. The company is also sensitive to the existing environmental concerns and wishes to do its bit by implementing designs and safe practices that are eco-friendly.

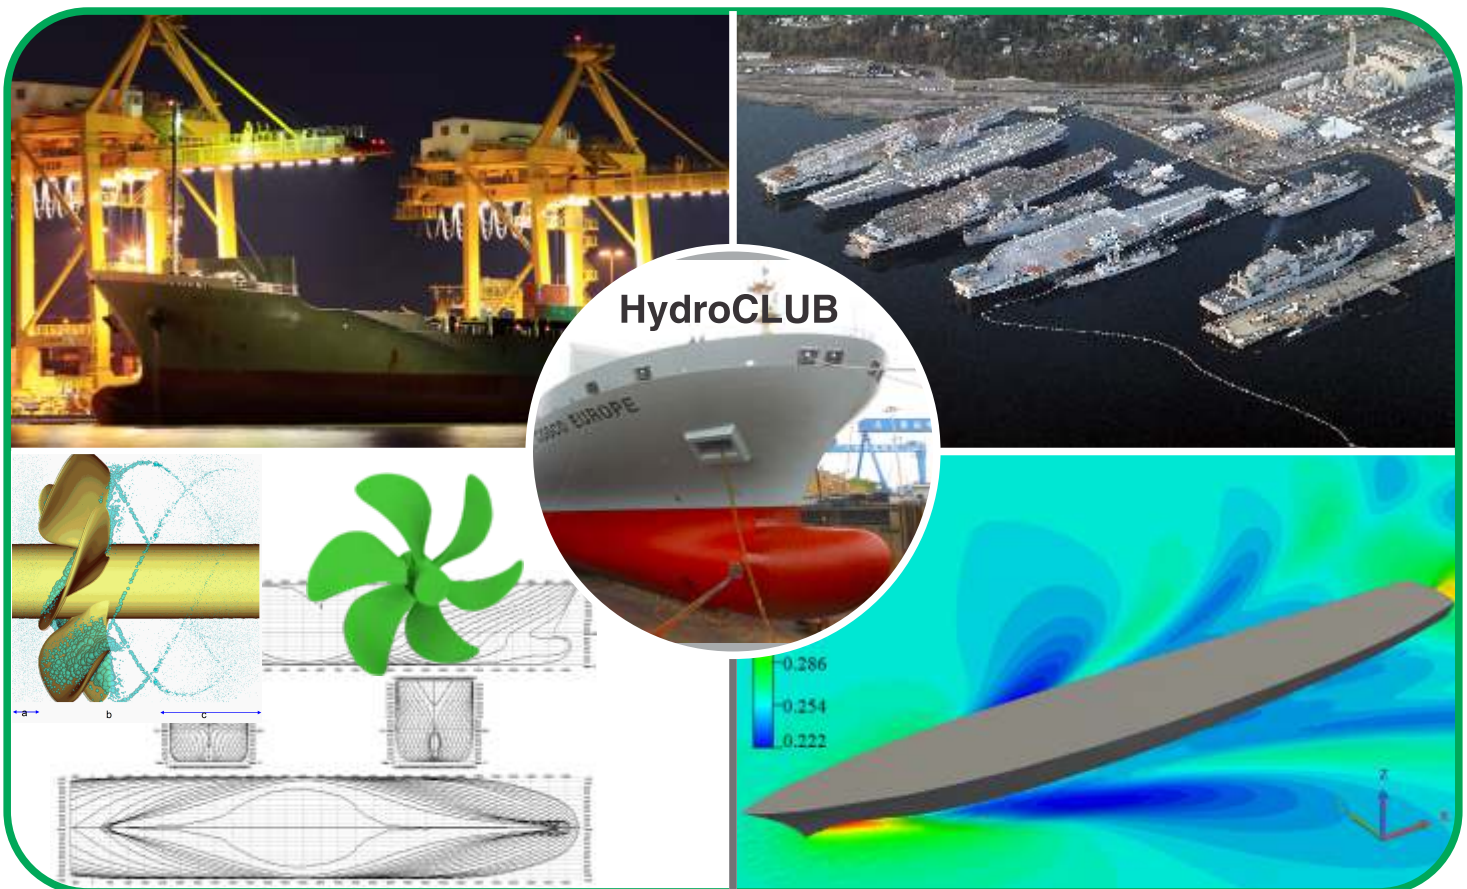

HydroCLUB

Have you been draining your money every year on hydrodynamics training and consultancy services? Here is the most cost-effective and the smartest way out of this issue – HydroCLUB. GreenSHIP presents to you its innovative HydroCLUB, a one-of-its-kind technology based club in the maritime arena.

What is HydroCLUB?

HydroCLUB is a boon to maritime companies which struggle to get affordable training and consultancy services. The club puts forth convenient packages of Hydrodynamics trainings and solutions to its members. Here, you get to be catered by industry experts who render you guidance and solutions combining latest technology with their hard earned years of experience.

How HydroCLUB helps you?

The services rendered by the HydroCLUB are designed to be in line with the technical, budgetary and market requirements of the maritime industry.

Being a member of the HydroCLUB, you can reap multiple benefits and achieve highest ROI (Returns on Investment). Here are your gains,

- Hydrodynamics trainings and consultancy services at extremely reasonable prices
- Get professional solutions for any real-time hydrodynamics problem
- You never will have to buy any software again, because HydroCLUB has an extensive set of valid commercial software to cater to all your Hydrodynamics needs
- Designs, solutions and guidance given by experts with highly specialized Hydrodynamics knowledge
- Enriching training sessions on Basic Hydrodynamics, Advanced Hydrodynamics and Latest Commercial Software's Current Developments and Limitations
- HydroCLUB is the one-stop-shop for all your Hydrodynamics requirements, bottlenecks and challenges

With the vision of expanding its HydroCLUB benefits across the globe, GreenSHIP ensures that only top quality material passes through its system, whether it is training, service, solution or just an interaction with its members.

Membership Benefits for you

GreenSHIP always believes in keeping it simple, affordable and helpful. You can become a member of the HydroCLUB and enjoy multiple benefits for lesser cost or with no cost at all.

Free Services for Members:

- Gain technical training on commercial software every single year
- Level-up your knowledge in Hydrodynamics with advanced trainings
- Keep yourself updated with the latest developments and their applications in the field

Paid Services for Members:

- Receive consultancy services at a cheaper price
- Get perfect numerical solutions for new designs and operations
- Obtain completely customized software for your marine application needs
- If you have new designs and special operations, you can avail flawless validation and evaluation reports
- Make use of high-end and licensed software for comprehensive marine simulation
- Keep your ship yard and design requirements well managed with single point of contact, at the HydroCLUB

Be smart...don't miss the cost-effective and high-quality hydrodynamics solutions. Grab a HydroCLUB membership slot today! Reach us at (Give Phone, email, etc.)
